The School aims at identifying and nurturing the innate potentials of every student through the curricular, co-curricular and extracurricular activities. Through these activities the process of "Information" takes place. When this information is assimilated "Formation" happens. Various inborn and acquired talents of students are developed and moral behaviour is inculcated through the continuous process of caring in intellectual, spiritual, psycho cultural and corporal realms. This formation automatically leads to "Transformation". Students become means of social change transforming the society into a better place to live in. The students are thus motivated to aim at excellence not only in academic pursuit, but also in all aspects of human endeavour and adorn themselves with the hallmarks of a holistic personality. Every student is transformed into a courageous, disciplined, noble person to face the challenges of the world with deep trust in God, lighting the candle of hope for millions in the world at large. With this goal in mind St Joseph's Public School has taken as its motto "Information, Formation and Transformation."
